| Sea Surface Temperature | 27°C - 30°C                                                                                                                                                                                                                                                                                                                   |
| Baro Pressure           | 1003 -1009 mb.                                                                                                                                                                                                                                                                                                                |
| Rainfall                | Light rain/shower and gusty wind is likely to occur over Bay of Bengal & adjoining area.                                                                                                                                                                                                                                      |
| Visibility              | Visibility: 2.5-4.5 km (Hazy condition likely to occur during rain/shower)                                                                                                                                                                                                                                                    |

**Marine Weather Outlook (08 to 15 Sep 2025):**

- Trough of low lies over North Bay of Bengal. Monsoon is moderate over North Bay of Bengal. Rainfall activity may increase.
- Due to low atmospheric pressure, moon phase and heavy rainfall, tidal height may increase 22-38 cm from predicted height in BN Tide Tables, inundating low-lying coastal areas during high tide.
