| Baro Pressure           | 1002 -1009 mb.                                                                                                                                                                                                                                                                                                                |
| Rainfall                | Light to moderate rainfall and gusty wind is likely to occur over Bay of Bengal & adjoining area.                                                                                                                                                                                                                             |
| Visibility              | Visibility: 2.2-3.5 km (Hazy condition likely to occur during rain/shower)                                                                                                                                                                                                                                                    |

**Marine Weather Outlook (29 Aug to 05 Sep 2025):**

- The well-marked low area over Northwest Bay off Odisha coast weakened into a low pressure area over Odisha and adjoining area. Monsoon is moderate to strong over north Bay of Bengal & adjoining area.
- Due to low atmospheric pressure, moon phase and heavy rainfall, tidal height may increase 25-40 cm from predicted height in BN Tide Tables, inundating low-lying coastal areas during high tide.
